

L5 Limo GT

100% Electric
#jointheride
in 30+ countries

Features

Ample leg room and headroom

Ample head room and leg room in the Limo GT provides the extra comfort than the city tour buses and taxis, for its passengers making it a sure-shot hit with the tourists and providing an experience they will never forget!

100% electric

The eTuk Limo GT is 100% electric and is available in 15KwH Li-ion battery.

All day battery!

With more than 130 km range with 15KwH Li-ion batteries, the new Limo GT is perfect for a fun-filled ride around the city.

Modern design

The new Limo GT has been produced according to the highest quality standards in the Automobile industry yet having gorgeous looks & ultra modern design, the new Limo GT is a definite head turner.

High return on Investment

With its large passenger capacity (4+1) low maintenance costs, and cheap and clean electric "fuel", the eTuk Limo GT provides a solid business case with a high Return on Investment.

Silent

Your passengers will only absorb the vibe and sounds of the city and not of the engine!

Vehicle Intelligence System

The Vehicle Intelligence System (VIS) measures the performance of the vehicle & battery, shows live tracking, and with the add-on of sensors to the eTuks many more items can be measured. With the assembly of a hardware tool inside the eTuk a big number of parameters are measured. The parameter values are provided on the VIS platform, so that fleet owners can manage, be proactive and secure costs in an optimal way.

Small & big data provider

We analyze how cities and their transport networks/solutions are developing, to learn to manage urban systems which are becoming larger and more complex. Smart-driven vehicles are what we provide. Digital assistance is important to make our jobs easier.

Batteries That Meet Your Needs

The battery is the heart of an eTuk. Our team at eTuk Factory creates the functionality profile for your business case and provides you with the best-suited lithium-ion battery pack which is completely assembled in-house for your eTuk.

Quick facts of Lithium-ion Variants

						
	Range	Weight	Charging Time	Battery Lifecycle	Battery Life	Maintenance Free
7KwH	>60 Kms	107 Kg	5 hrs	>1000	3-5 years	✓
15 KwH	>130 Kms	140 Kg	5hrs	>1000	3-5 years	✓

We ensure every battery pack fitted in eTuk has
